Brereton Colliery Rescue Team c1955

Brereton Colliery c1950s

St Michael's Church, Brereton, showing the 'Ginnies' railway crossing the road.

'Ginnies' tunnel under the A51, later used as an air-raid shelter and pedestrian underpass.

Talbot Basin, Armitage Road

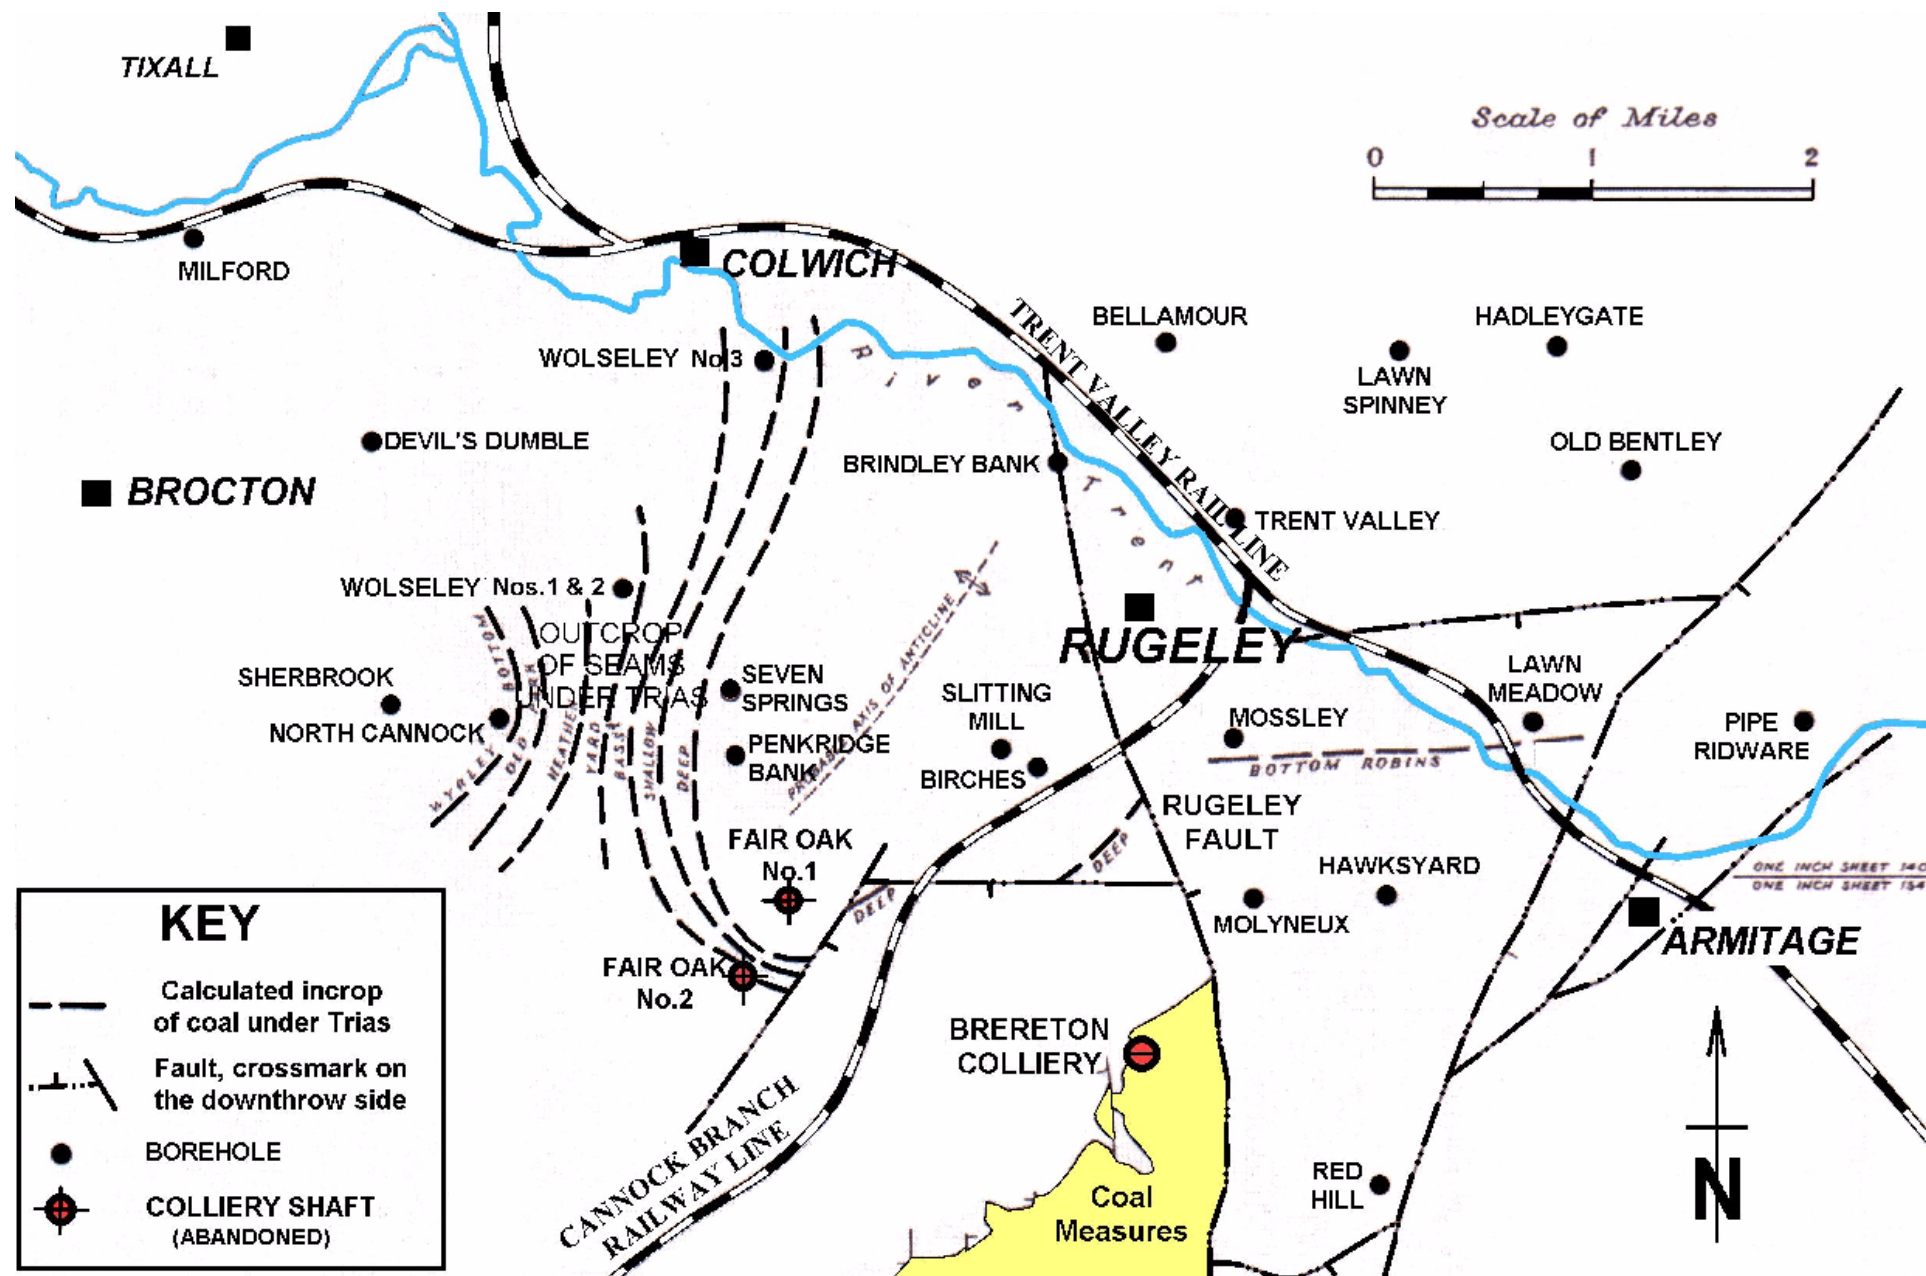

WINNING COAL

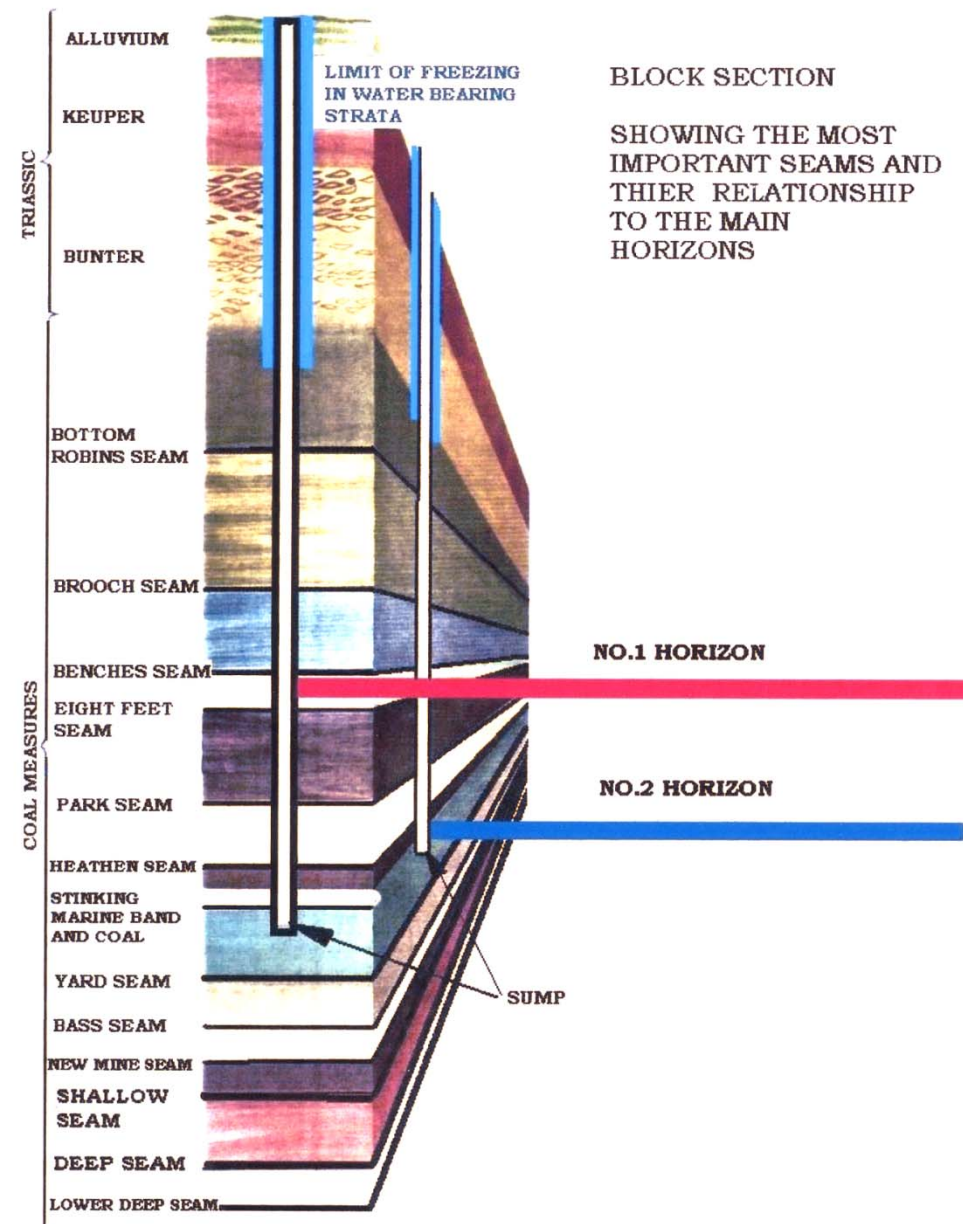

AT LEA HALL

One of the 22 test
boreholes sunk
to prove the coal
seams in the
Trent Valley.

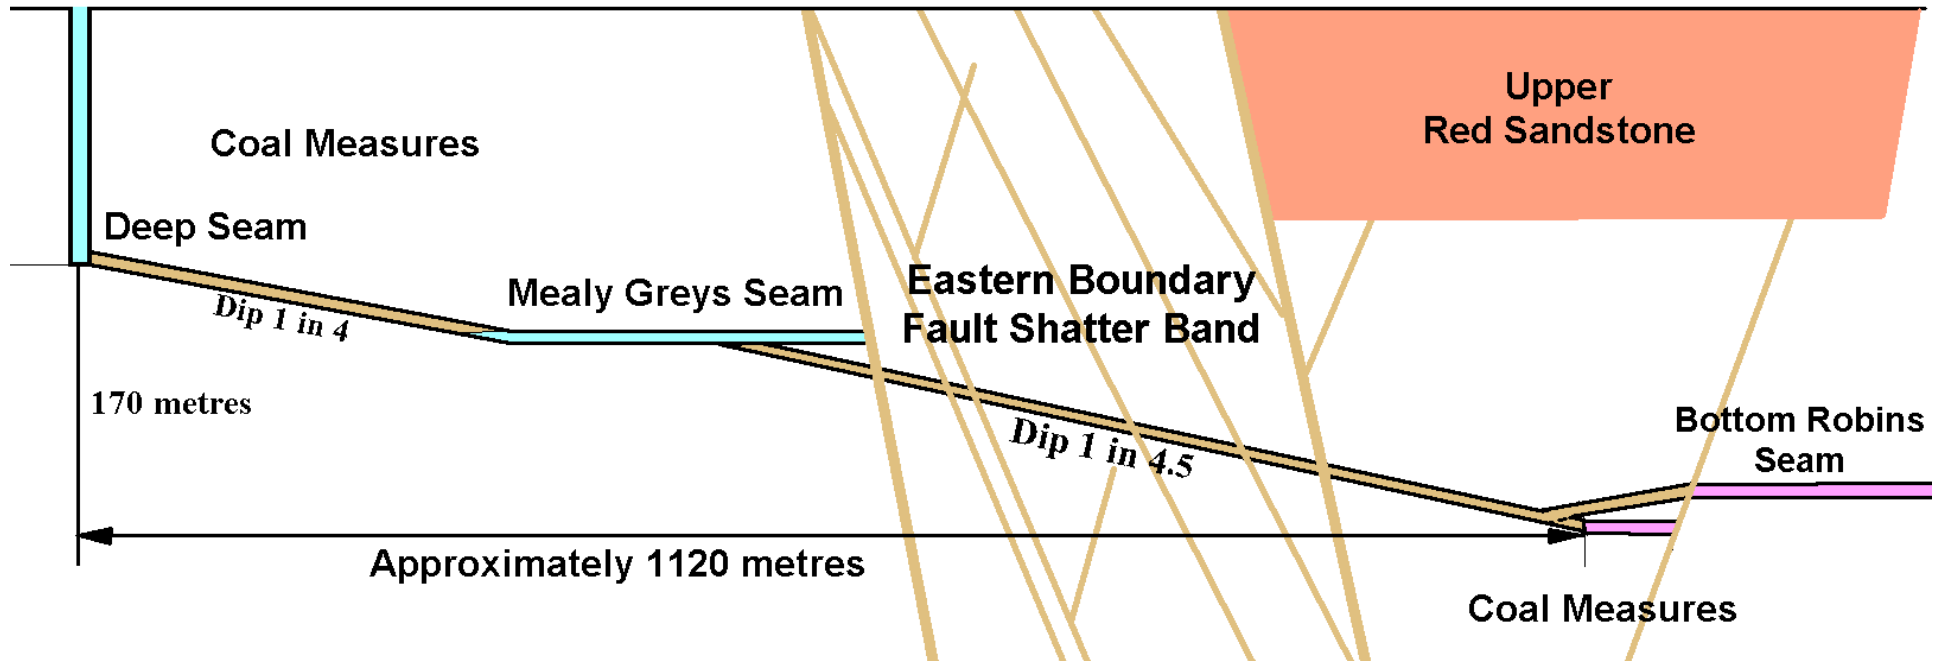

Lea Hall coal seams
shown in relationship
with the main shafts.

Marker for one of Lea Hall Shafts.

BRERETON COLLIERY

Showing how Brereton Colliery accessed the top coal seam in the Trent Valley area which extended the colliery's life by some 6 years.

COLLIERY PLAN

6,500 tons per day

Rising to

8,000 tons per day

Employing 3,000 miners

Life expectancy 100 years

Construction cost £14 million

Lea Hall sinking site c1953 before the start of shaft sinking.

Constructing shaft collar.

Freezing equipment at shaft top

Sinking bowk.

Shaft sinking in operation.

Constructing the concrete shaft wall.

Showing the pockets
left in the shaft wall to
later accommodate
shaft furnishings.

Shaft sinkers

Combined Colliery and Power Station sidings.

Constructing the new headframes around the sinking equipment.

New entrance bridge to the colliery.

Twin winding engine house,

No 1. Ventilation Fan driving motor

Compressor House.

Colliery site nearing completion.

No 1 Horizon (Inset) adjacent to the shaft.

Underground battery locomotive garage.

Downcast Pit Bottom, c 1960 only one side in operation.

B39s Junction with the pit bottom horizon.

Demolition of Brereton chimney 1961.

NATIONAL COAL BOARD

CANNOCK CHASE AREA

LEA HALL COLLIERY

Official Opening

JULY 19 1960

Mrs Brown performing the opening ceremony.

LEA HALL COLLIERY

<u>Year</u>	<u>Average Manpower</u>
1960	675
1964	1,700
1970	2,000
1975	2,158
1980	2,300

NEW HOMES

<u>Estates</u>		<u>Built</u>
Pear Tree	650	1950s
Ravenhill	100	1950s
Handsacre	300	1960s
Springfields	500	1960s

Total 1550

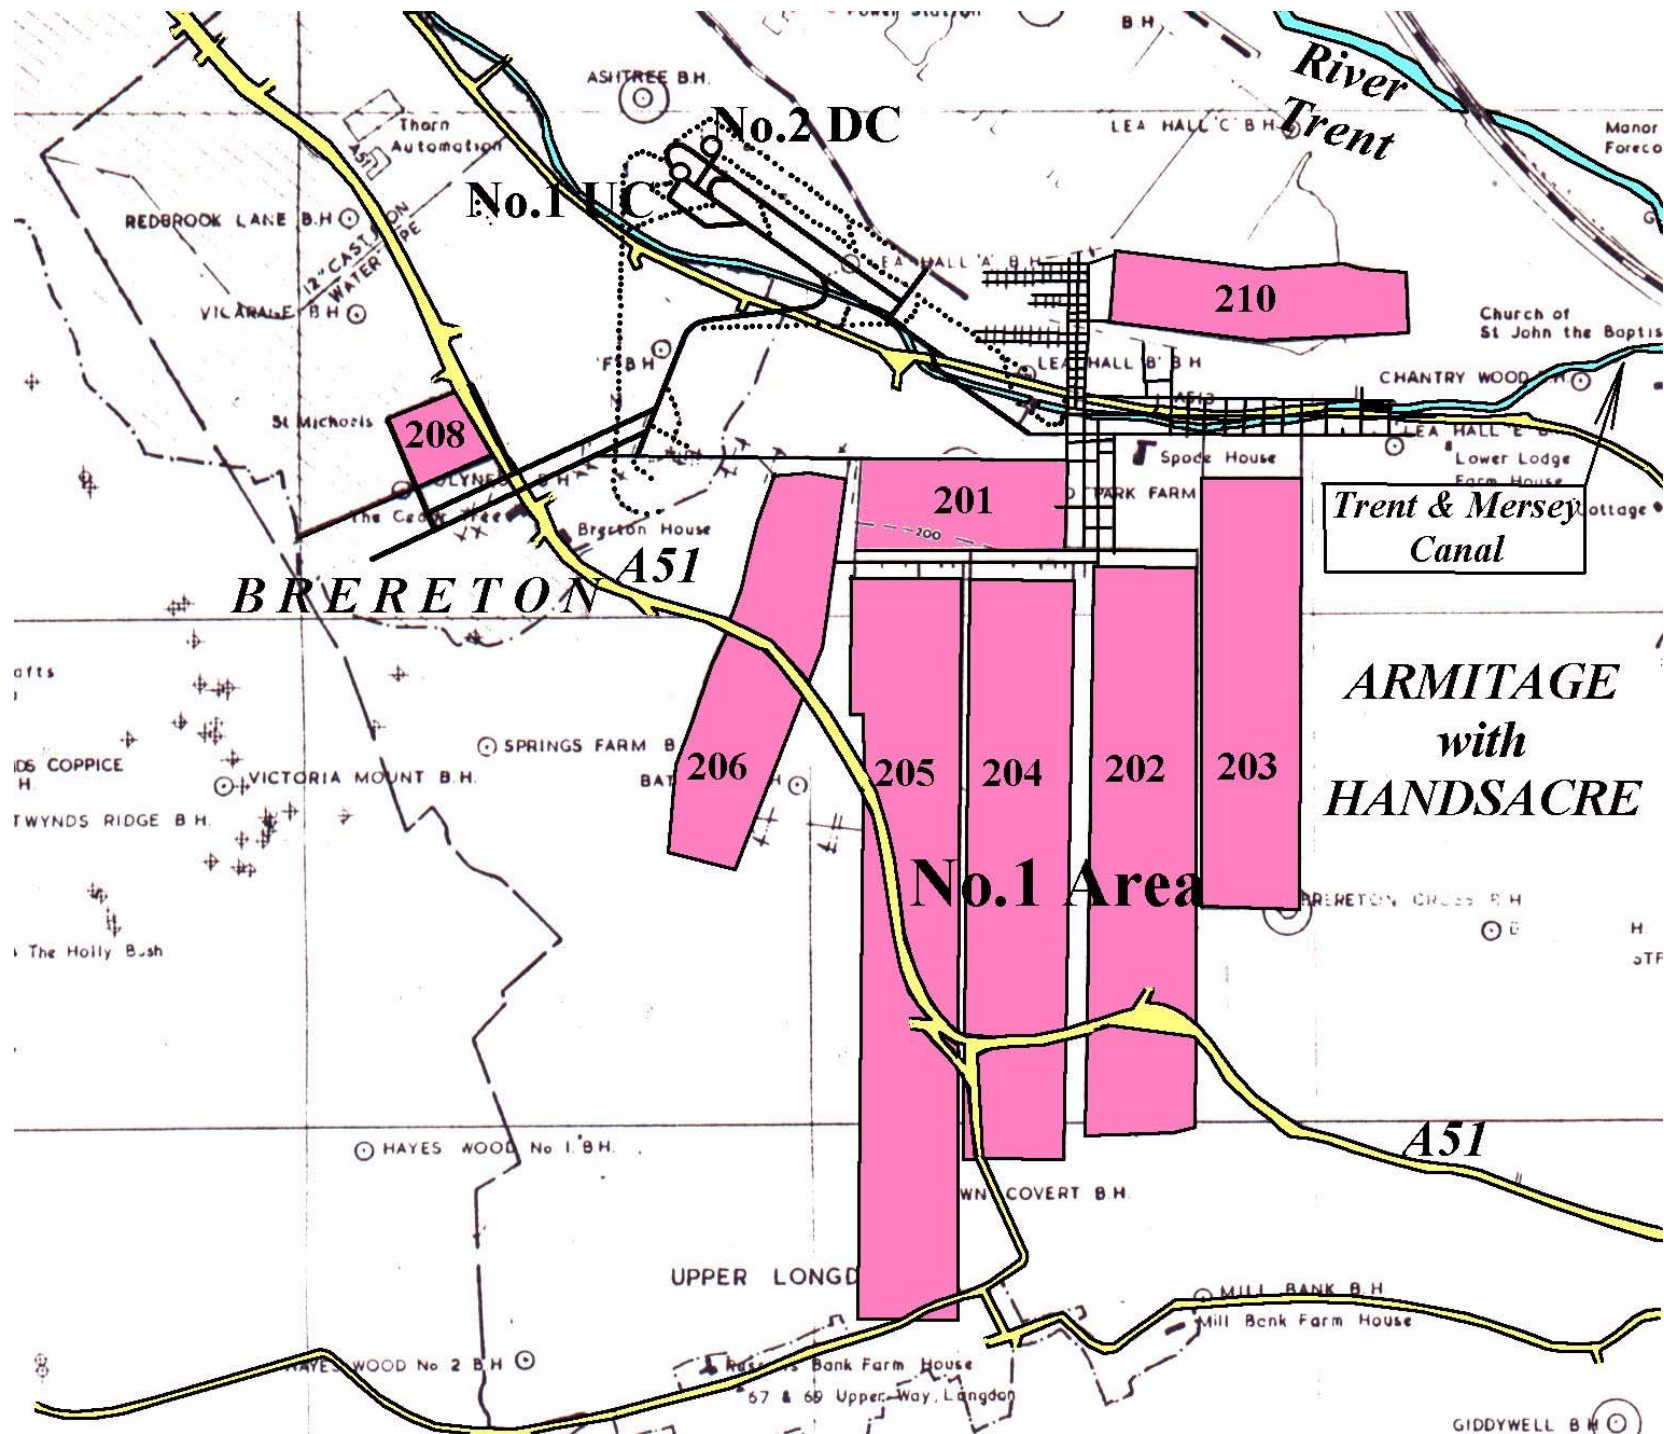

Showing the temporary hoist
used in constructing a staple
shaft

Starting to sink
a staple shaft.

First Million Ton raised in 1964

LEA HALL COLLIERY 750s YARD SEAM

Underground 3,300 volt distribution sub-station c1965

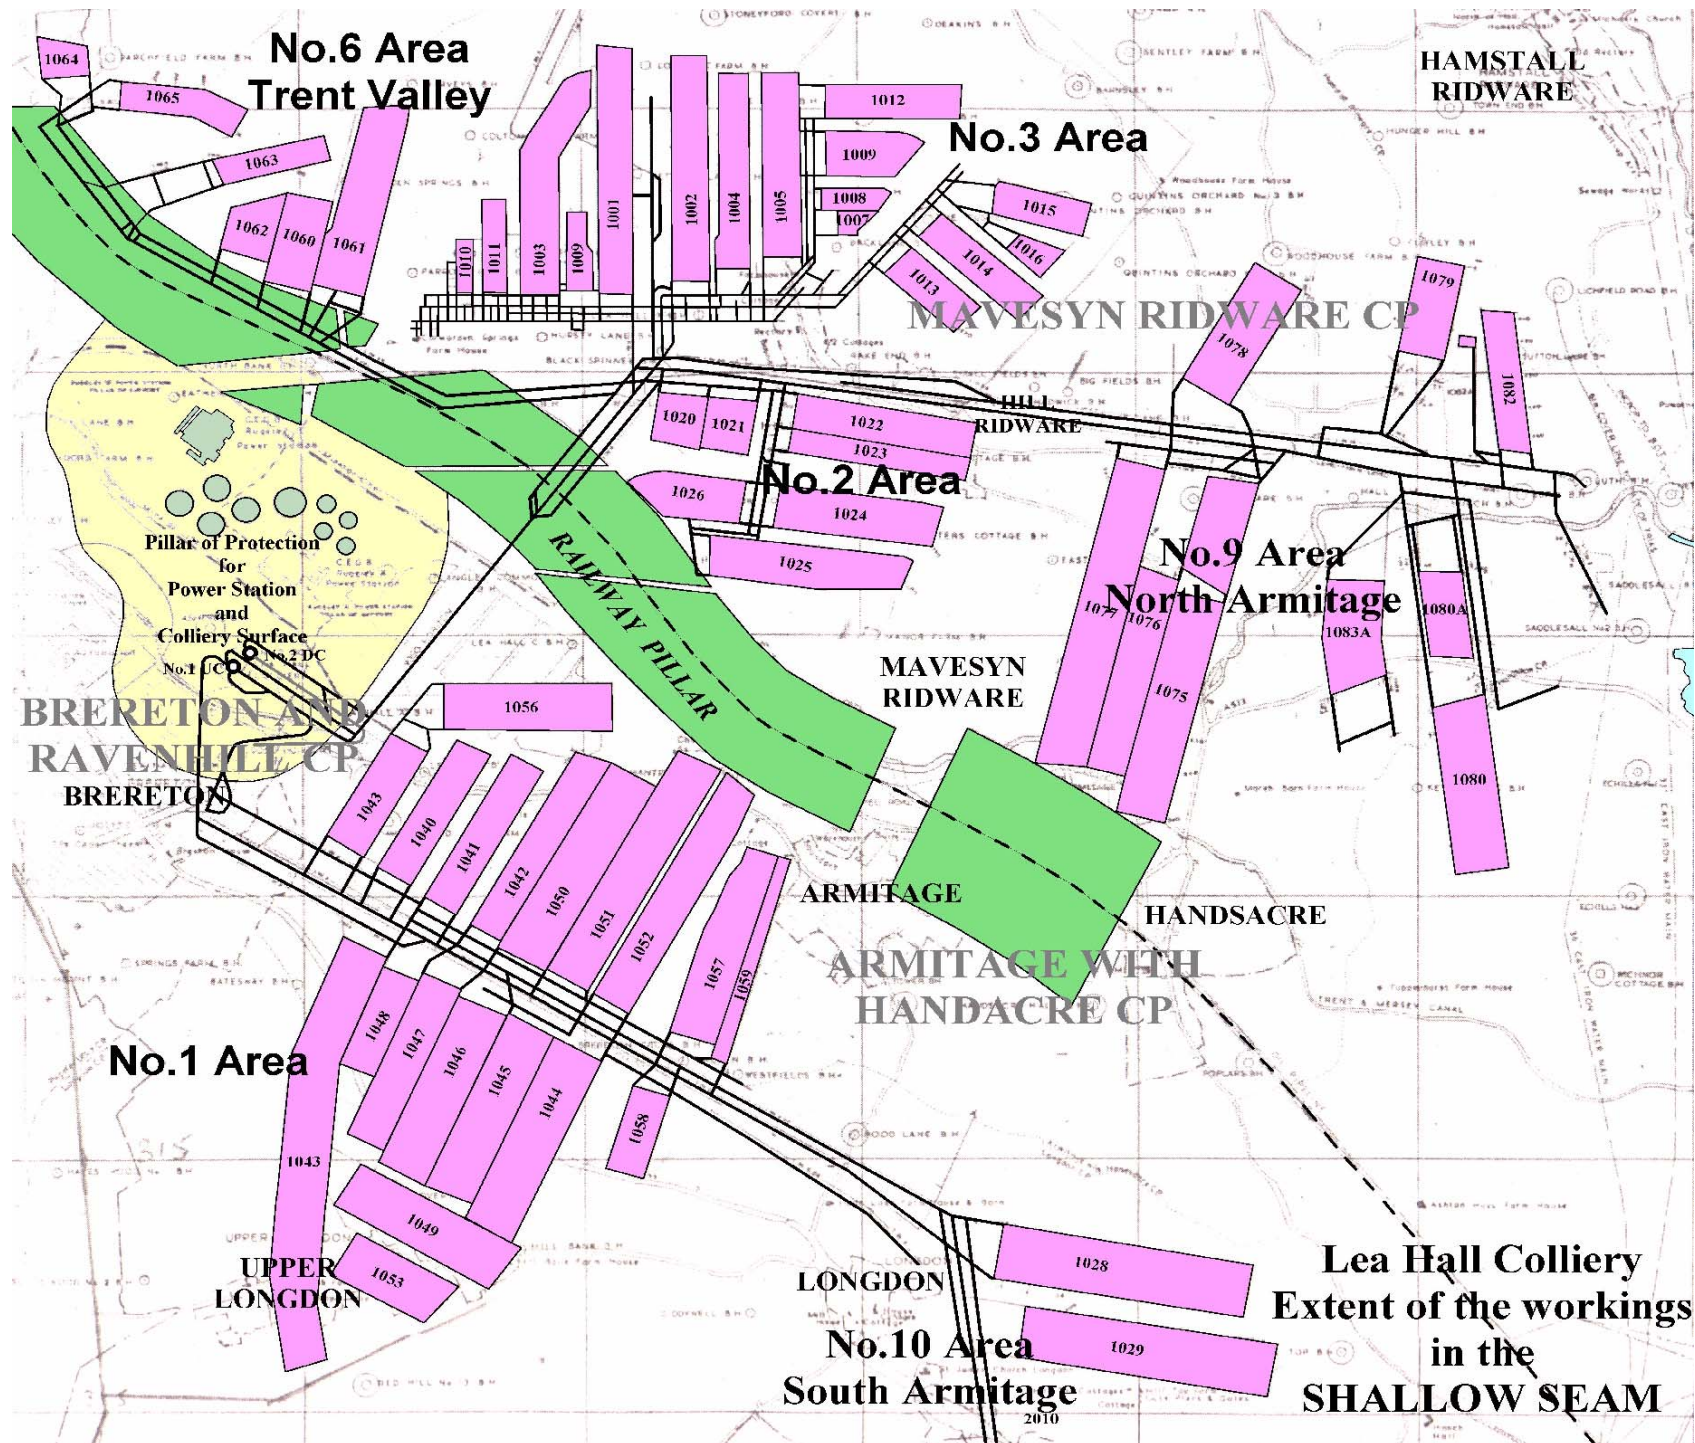

First manless conveyor control desk installed 1964.

Undated conveyor control (computerised) c1980.

1014s face celebrating the European record in 1970
Million ton face; Production at a level of 1 million tons per year

Winders & Sinkers reunion.

Lea Hall miners
marching
through Rugeley
on the "last day"

Members of the Power Group NUM Area
with the union banner outside Lea Hall
club at the end of the march. On the far
right is **Edgar Bayliss** a retired miner who
was a shaft sinker. He was the only man
present on the last day who was there at
the pits beginning.
